EXTERNAL EVENT PARTICIPATION REPORT

Event Name	**PEC HACKS 4.0**
Date	28 August 2026 – 30 August 2026
Time	29 August 2026, 6:00 AM – 30 August 2026, 6:00PM
Venue	Panimalar Engineering College, Chennai, Tamil Nadu
Participants	1. Aaron Alphons Thomas (23MIS0684) 2. Gowtham G (23MIS0520) 3. Kaarthik M (23MIS0050)
Team Name	ThinkInBetween
Team ID	O05
Domain / Track	Open Track

The team was selected among the **Top 50 teams from more than 5,000 participants in the first round** of PEC HACKS 4.0. The event details identify the team as **ThinkInBetween**, Team ID **O05**, under the Open Track, with reporting scheduled for 29 August 2026 at 6:00 AM at the Auditorium, Panimalar Engineering College.

Day 0 – 28 August 2026

The team travelled from Vellore to Chennai by **public bus transportation** to participate in PEC HACKS 4.0. We reached the venue at approximately **9:30 PM** after having dinner outside. The management of Panimalar Engineering College had arranged **accommodation for the participating teams**, which provided us with a place to stay before the commencement of the hackathon. The day mainly involved travelling to the venue, settling into the accommodation, and preparing ourselves for the hackathon scheduled to begin the following morning.

Day 1 – 29 August 2026

The first day began with the **registration and verification process**, during which the details of all participants were checked and confirmed. The event then officially commenced with an **inauguration ceremony attended by the guests and college management**. Following the inauguration, the hackathon timer was officially started, marking the beginning of the development phase.

Our team, **ThinkInBetween**, began working on our proposed project, focusing on implementing the planned solution, developing the required components, and continuously testing and debugging the system. Throughout the day, the team worked collaboratively under the time constraints of the hackathon. The first project review, **Review 1**, was conducted at approximately **8:00 PM**, where the progress and development of the project were evaluated. The event management provided food and refreshments throughout the hackathon, allowing the participants to focus continuously on their development activities.

Day 2 – 30 August 2026

The second day continued with the hackathon timer running, and our team continued **building, integrating, testing, and debugging the project**. The remaining time was utilized to improve the implementation, resolve issues, and prepare the project for the final evaluation.

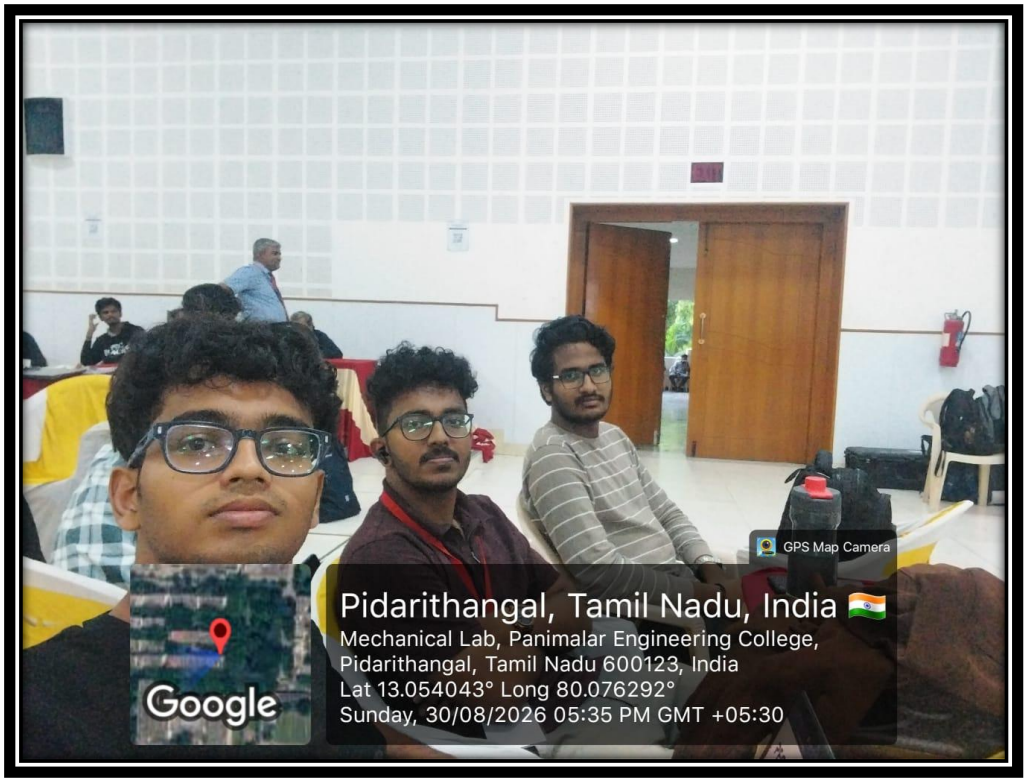

Review 2 was conducted at approximately **5:00 PM**, providing the team with an opportunity to present the progress and completed work to the evaluators.

At around **6:30 PM**, the organizers announced the **Top 10 teams** selected for the final stage. Although our team had successfully reached the **Top 50 teams from more than 5,000 participants in the first round**, we were unfortunately not selected among the Top 10 teams. Following the announcement, the **Valedictory Function** was conducted, marking the conclusion of the hackathon. After the event, we left the venue and travelled back to **Vellore by public bus transportation**, concluding our participation in PEC HACKS 4.0.
